What an amazing book!! Every woman dreams of being able to retire their husband, but they don't know how. This book lays out simple action plans to take control of your situation. You finish the book with the belief that you have the skills and self confidence to take control and retire your husband. My favorite part is the focus on finding people's personal strengths and talents and using that to become successful. This book was written to empower and lift you up.

The title of this book really suckered me in as I had a nice little chuckle to myself. I had a little fantasy that my wife could pension me off! Instead what I found were practical tips to keep you on

the path to success in network marketing. The stories in the book were motivational and I particularly enjoyed the chapter on how do I keep the motivation going. This relates to me personally as I can tend to flatline a bit sometimes. I think most newbies will find the how to get started chapter the most helpful though as this really is where most people try, fail and then give up. Many of the ideas presented are ways to help you overcome obstacles, particularly the daunting parts like trying to close a sale, which is broken down, analysed and made a lot easier by this book. The exercises in this book are quite helpful and easy to do. Overall, there's a fair bit of meat in here, and is definitely useful for the beginners.

This book is little more than a cheerleading promotion for network marketing. It offers no new insight on how to start or run a business. It tells you to make lists (as if most of us weren't making them already), and stay positive. I am positive that if you are looking for a book that will give you some "meat" or specifics on how to start a business, you won't find it here.

There was no solidity to it. It jumped all over the place. They keep telling you they will give you the insights on how they will help you in the next chapter, but the next chapter comes and it's the same verse. Goes to show just because you can make a lot of money doesn't mean you should write a book about it.

This is a go to book for anyone needing knowledge or expert advice in how to get set up and started in direct marketing or relationship marketing in very practical and realistic terms. A must for anyone who wants to be successful.

Not an instructional manual. No real tips given. Just talking about what life is like for the authors. I don't feel like I learned anything new. Definitely not one of the leading books in this industry. Really felt like a waste of my time

They have incredible perspective when it comes to the business from the experience that they have. You can gather that from the book that is written here or from listening to them on company calls. Though they are careful not to make this book pitchy, which I really respect about the writing style, being in the same network as these women and hearing them talk over and over through the weeks on it works conference calls they know what they are talking about. They are graciously sharing their experience and secrets to success in this book which can be applied to any networking

business. If you ever wanted to know what it really takes to create a successfully network marketing business now is your chance. Buy this today. You won't regret the real world examples of what it takes to get to the top!!!

Lacked substance, offered no real information or guidance, just chapter after chapter of cheerleading and platitudes. Totally lacking in substance. Sorry, writers, but all this book does is repeat the same thing over and over again, and even that is thin and devoid of substantive information. My apologies for the negative review.
