Synopsis

He's back! In a voice more cantankerous and comically pungent than ever, George Carlin spouts off on everything from British royalty ("A Day in the Life of Henry VIII") to auto racing ("Sports Should Be Fixed") to American politics ("Don't Blame the Leaders"). With his manic mind and motor mouth in high gear, he rants against anyone who tells him to "have a nice day" and skewers the euphemism epidemic ("To be honest, some of this language makes me want to vomit. Well, perhaps 'vomit' is too strong a word. It makes me want to engage in a involuntary personal protein spill"). When Carlin's in a more reflective mood, he reveals, "I couldn't commit suicide if my life depended on it," and ponders the really big questions, like "Is a vegetarian permitted to eat animal crackers?" and "Griddle cakes, pancakes, hotcakes, flapjacks: why are there four names for grilled batter and only one word for love?" What his candid take on "life's little moments" lacks in political correctness, it more than makes up for in gut-busting laughs. He's the guy who dares say what the rest of us hesitate even to think. And he does so in ways that are often raunchy and always riotous.

Customer Reviews

Much of this - and I mean MUCH of this - most Carlin fans already own in one capacity or another. A lot of this consists of material drawn from his "You Are Diseased" record and other older stuff as well, so if you're already a fan, steer clear. Having his material presented in an audiobook format (him in a studio reading into a microphone with no crowd interplay) just deadens much of the material and makes you overly conscious of how he does the magic. There are times when he reads off stuff

that, when you hear it live, you think is aside material (the errant curse word, the witty follow-up). When presented here, this normally dicey flavor just comes off scripted and flat. Stick to his live records. This is just an attempt to stay in the mix because the book versions do so well (bearing in mind, the books basically codify his stage material beyond the excellent "Brain Droppings" tome).

People probably thought I was insane as I drove past them in my car laughing at this very funny audiobook. I have to guess that the audio version is better than the text because Carlin's delivery is so fantastic. You really have to hear the way he says it to get the full impact of the humor. Carlin is a master at two things: 1.) Carefully choosing the exact words to describe stupid things about life 2.) Expression and delivery. In this book he talks about some of the silly things we say like, "Give my love to so and so" and "Do you have the time"? Both very funny sketches. It's not a live comedy show so there is no laugh track which I find makes the silly nature of the subjects even more amusing. At times, he goes overboard and I think his far left political commentary will offend but I'm sure he doesn't care. Some of the jokes aren't that funny and I think he was running short on the "A" material. Nevertheless, there is plenty of hilarious stuff here and if you're a fan of George Carlin you won't want to miss it.

Buy used, and only to complete a collection. It is funny, but it is the comedic equivalent to a reflux disease and the up-swallow of all his old work. Carlin fans already own the bulk of this in one capacity or another. If you are a female this artist often feels rough, sort of psycho, and angry bitter. As a woman you sort of wonder how his wife puts up with the madness because he has no soft or sly delivery techniques in this work. He is in your face and on a rant with no answers offered to the problems of the world he obliterates. Just complaints. This is a created to be gift for a liberal guy in his 50's who remembers that Carlin actually HAS made a political contribution to our society through his work on free speech. If you have no idea what to get your uncle, brother, or father for his 50th birthday get the whole set of George Carlin on CD. This as a book is sort of sad, and as a CD is best bought to complete a set. If you are buying only one item of this artist it is not stand alone quality. It's difficult for people like George Carlin to live in such a crazy country. Anyone with a logical and

objective mind can see the silliness of religion. It is the greatest scam ever pulled on mankind. The religious right with their backwardness and ignorance have plenty of time on their hands hence all the bad reviews here. Well if you lot want to chant on a daily basis to an invisible man in the sky that's your business.... the rest of us will just laugh our heads off at you and make sure your moralistic and hypocritical rules don't invade our wonderful free country. Go and join the taliban and form your own country and enjoy many hours a day chanting at the sky. It's a wonderful book from an american genius.

WHAT Kind of an as*h*** writes down 300 pages of questions and doesnt give one f***ing answer. Think About that Eh!
