Economic Collapse (Prepping For Tomorrow Book 2)

Synopsis

All empires collapse eventually, and America is no exception. Their reign ends when they are defeated by a larger, and more powerful enemy, or when their financing runs out. From the author of CYBER WARFARE and EMP: Electromagnetic Pulse, Bobby Akart undertakes a detailed review of the history of empires and nation-states, and their ultimate demise. ECONOMIC COLLAPSE is a primer on the reality that our nation will ultimately perish at the hands of economic and societal collapse. The United States economy can collapse as a result of our own government's mismanagement of our national debt or external factors such as a global financial meltdown, an attack on the US Dollar, and other predictable events. Why do you think the Federal Reserve is so frightened of raising interest rates despite apparent underlying inflation data? Our economy is a house of cards. We are just a few steps away from a collapse of the dollar and hyperinflation. History is replete with the rise and fall of empires. Are Americans so arrogant, or oblivious, to realize that we are in a stage of decline and collapse? Some of the signs of decline include a downward cultural spiral, an over-reliance on government and the inability to protect the integrity of a nation's borders. Sound familiar? All empires collapse eventually. There have been no exceptions in the history of humanity. None. All empires end when a more vigorous empire defeats them--or when their financing runs out. Because you never know when the day before, is the day before. Prepare for tomorrow! ABOUT THE PREPPING FOR TOMORROW SERIES Freedom Preppers came together in 2011 to share research with others on the subject of prepping. Originally designed as an informational website, FreedomPreppers.com quickly grew in prominence as its articles on preparedness were shared around the web. The goal of the Prepping for Tomorrow series is twofold. First, provide a detailed analysis of the threats we face as Americans. Second, give new and seasoned preppers alike the opportunity to enhance their preparedness plan with this knowledge.

Customer Reviews

I found the material to be not only well written but scary. As a person on a fixed income coming from Uncle Sam, the ideas expressed scare the heck out of me. I began reading with the hope that the author didn't know what he was talking about but wound up finally with the idea that I need to do something to ensure my family is as safe as possible from what looks like an inevitable economic meltdown in the not too distant future.

OMG!! The guru of prepping has given us more information to prepare for disaster. This time he has provided us information for an economic collapse. Bobby Akart's newest installment in the Prepping for Tomorrow series really brings it home. I have said it before and I will say it again, Bobby is a prepping prophet. Take heed of his knowledge and use it to be better understand the world we live in and how volatile it is. A collapse event could happen at anytime whether it be economic, EMP or a cyber attack. If you have not read any of the Prepping for Tomorrow series please do so and be better prepared.

Throughout this series Bobby has done an outstanding job of breaking down possible collapse scenarios. He does a great job of not making it sound like a lecture. Prepping has become a way of life for many of us. This series reinforces why we prep.

Bobby Akart's best yet in the Prepping for Tomorrow series. He makes the economic nightmare scenario in our world understandable and very real. His writing encompasses both the historic and

current events that can cause an economic collapse. The use of examples throughout the book, like the 5 Thomas Cole paintings "Rise and Fall of Empires", enable the reader to picture the various possibilities and how they relate to the world today. Bobby explains the problems and various potential solutions and then asks how ready are you for an Economic Collapse? This book is a keeper for me and I am sure I will refer back to it many times.

Bobby Akart has systematically brought us through explanations of 'Cyber Warfare' and 'EMP's with accurate and fact-based data. This newest book, in the Prepping for Tomorrow series gives an in depth look into another collapse event. Specifically, an Economic Collapse. This book starts appropriately with a clear and concise explanation of economics. Well, as well as economics can be explained! Mr. Akart then dives into historic collapses of seemingly infallible empires and allows the reader to consider multiple faults for such events. The informative narration as to our own economy with an initial basis on gold and how our American economy now, in comparison to other countries, is absolutely illuminating. Many aspects of economic conditions and warning signs are put in 'easy to read' and 'easy to understand' models and examples. The entire book is frightening prophetic in a way that only Bobby Akart excels. An important book to read and reflect upon...and implement your own personal preparations for what will come. Extremely well done!

The most important of the Prepping for Tomorrow series, IMHO, because regardless of what country/what primary currency you are using, the very real and pressing danger applies to all, as the world of finance has become so terribly interdependent. The copious examples from history are much more than I learned in school, and as a result of reading the book cover to cover over the course of a couple of hours, I am having crucial discussions with my family addressing the shortcomings in our family plan and situation. This is a very good book and belongs in every high school.
