I recently purchased a copy of this book as I was preparing to facilitate a workshop on respect in the workplace. I had used games in previous training sessions but was pleasantly surprised when I came across this book. I referred specifically to Chapter 8, dealing with reducing workplace negativity. I found that the games triggered a powerful response from the participants as their concerns became very obvious in a non-threatening way. The real benefit was what happened at the debriefing. Our discussion of issues turned into in-depth problem-solving. One participant said that an issue that had been festering with her for over three years was effectively resolved because the matter was finally discussed openly. Fifty games set out in a manner that is easy to follow, easy to understand, and clearly focused on the concern being addressed, each game in a group probes deeper into the issues without getting personal. The final game in each group leads workshop

participants to make a commitment to change. The structure of the games also permitted enough flexibility to address a group's specific workplace behaviors thereby making the exercise very relevant to the group. Based on the responses from participants in my recent workshop, the point of the games came through clearly and effectively, and will result in real change in their workplace. Very powerful catalysts, your games are. I must also say that I am thoroughly enjoying this book! As a human resource consultant and trainer, I am always looking for new ways of thinking about change. This book is stimulating my mind to find other ways to present ideas in a fun and creative manner. Doni and Sharyn really helped make my job as a facilitator easier by giving me such powerful tools. I am keeping my eyes open to purchase other books by Doni & Sharyn to add to my library. I can hardly wait for Doni's new book, LAUGH AND LEARN: 95 WAYS PEOPLE WHO TEACH CAN USE HUMOR TO BOOST THE BRAIN.

I got this book with Brian Miller's Quick Teambuilding Activities (also from .com). Both are good. This one has more activities, but not necessarily better ones. I like the way this one often has a "suggested funny intro" for introducing the activity because I usually stumble in setting it up. The only problem is that some of the activities are quite long (up to an hour)...that's where Miller's book excels, all activities are 15 min or less. The activities here are organized into nice categories, too.

This book is a must for anyone who is involved with training or in giving presentations. I write and design training materials for a large corporation in which there is a constant need for training on many different levels. I have repeatedly used this book to make even the driest of training materials fun, interesting and interactive. The techniques work for all levels of employees from management down to Customer Service Representatives. Now people walk away from training classes retaining far more information than before I found and began using this book. Participation and interest have greatly improved. I highly recommend this book-don't wait another minute longer to buy it!

This book is a great reference for any trainer! Most of the Training Game books I have reviewed have a few games that really apply to your classroom needs. Not this one! There were very few of the games that I won't be using! So far, each one I have used has been received with enthusiasm by my students. I particularly enjoyed "Look Ma, No Hands" while training Delegation Skills.

This is the best book on training games I have ever read. It gives new insight that I have found lacking in other authors. Sharyn Weiss is a genius in her trade. Thank you for making my job in

executive and managerial training easier.

This is absolutely my favorite training game book. I wish there were more like this. Most of the other available books for leadership training games have just been so "done" throughout the years. Anyone looking for fresh ideas, I would recommend this book.

After reviewing this book, it was very helpful in doing physical activities for groups when discussing training activities. There are not many worksheets to help drive home the point, if you were looking for something for a group to do and discuss. These activities are more discussion after some form of activity. These can be fun. The book does have great insight in the beginning about discussing being aware of participants needs, physicality, and outright safety when doing these activities. Overall is okay if you want to through some different ideas into the mix of your workshops.

As a professional stand up trainer, I have a number of these books. So many of them just rehash the same icebreakers and activities we've seen and done for years. This book is so refreshing, not one repeat from another book and page after page are activities I can easily incorporate. I also like that the authors talk about what is funny and what is not and offer funny ways to introduce the activities. Then there are detailed ways to debrief the activity. Good stuff!
