Comedian and media star Steve Harvey has now penned his second best seller. In this book he is directing his advice to women, but I believe that men will benefit from this book just as much. The objective is to give women an informed understanding of men, and only a man could write such a book. There is no question that he is coming at relationships from a different point of view based on having living in his own intense relationships. He knows what works and what doesn't, and he has spent considerable time trying to figure out how a man is hardwired in his brain differently than a woman. Most of us are dealing with the behavior resulting from how we think. Harvey is suggesting

that we deal with the thinking itself. A key thought that he has developed is that everything we as men do is filtered through our title, which simply means who we are. The next question is how we get that title, which means what we do for a living. The final question becomes what regard we are held in by our fellow human beings. He is very honest in saying that by this we mean what is the compensation we receive. Harvey believes that unless we come to terms with these three questions prior to marriage, we probably can't be successfully married and therein lies the enormous divorce rate we witness in our society. Men are marrying prior to having an understanding of who they are. Without that self knowledge the relationship is doomed before it even gets started. I believe that Harvey is touching new ground in this book, and certainly has become his own person. In the book he develops the idea that we as men have to learn how to be men before we can be anything to anyone else, who chooses to love us.

I really enjoyed Steve Harvey's first book *Act Like a Lady, Think Like a Man: What Men Really Think About Love, Relationships, Intimacy, and Commitment*. I've read a lot of relationship books and it was the first one that I had read that really focused on a man's point of view and basically told women when it was time to walk away and how to recognize whether a man is a good man or not, not yet ready to commit or never will commit, etc. I'm giving this book four stars because it lives up to its title - it's straight talk. He's telling women things they might not want to hear. I'm not giving it 5 stars because I got bored with his personal anecdotes pretty quickly and because I know some men who are not anything like the men Harvey describes. I don't doubt that his analysis is accurate for most men, though. This book is a good follow-up for women who were left with a lot of questions after reading *Act Like a Lady, Think Like a Man*. So, I would first suggest reading that book and then reading this one. As a single woman in my 20's I didn't find this book as helpful as the first - don't get me wrong. There was a lot of good information, but it seemed to aimed more at women trying to keep/satisfy/or get along better with their man. For single gals, a book on how to find a man and cultivate the relationship early on would be better. I mean, I'm dating men in their 20's and early 30's and a lot of the advice seemed tailored toward more seasoned daters.

First, let me say that I am not a fan of Steve Harvey. I've always thought he was a bit pompous and "me" centered and that hasn't changed after reading his book. I still think he's a tad arrogant to be writing relationship books; I ordered this book only because it was available briefly for free on Kindle pre-order. Who made him an expert? That said, what makes him an expert is that he's a MAN. He knows what men are like and he's honest with women about what men really think and how they

really behave when we're not around. I think every young woman should read the section where he delineates what men are looking for in their 20s, 30s, 40s, 50s and beyond. As a 61 y/o woman who has been happily married for 15 years to a good yet flawed man, I think Mr. Harvey gives sound advice, whether women want to hear what he's saying or not. What makes me choke on giving 5 stars is that I do not like being placed inside a category (ie. the assumption that all women think or act the same). For instance, his first book's title: Act Like a Lady but Think Like a Man. As a woman, I think like I think; I do not think like either a man or a woman and resent the inference that we are all cookie-cutter copies of one another. As a young woman, I thought like a ditz and now, as a 61 y/o woman working on her doctoral program in Psychology, I use critical thinking and hopefully think like a scholar. Also, not all women are so desperate that they are in a hurry to get married. Some women prize an education and desire to have a career while they are still young enough to enjoy its rewards just as much as a man does. No woman should ever "settle" for less than what she wants in a man just to alleviate her loneliness.
