Jewelry Making For Beginners: A Complete & Easy Step By Step Guide (Ultimate How To Guides)

Synopsis

Jewelry Making for Beginners is an audiobook that not only highlights the basics of making various types of jewelry, it also goes just a bit further into the process without making it overwhelming for the beginner. The aim that the author has with this audiobook is to inform and educate and make the overall process as easy as possible to execute. The individual that has no concept at all of what jewelry making entails can listen and not only get an overview of the jewelry making process but also get a bit of insight on the various processes that one can focus on be it using metal or beads or gems and stones. This audiobook is a great source of reference for any hobbyist with an interest in making jewelry in their spare time or someone who has a creative side and has an interest in earning an income from making jewelry. The audiobook is a great place to start to achieve that goal of creating great piece of wearable art. Of course this will not appeal to everyone as not all are interested in using their hands or creativity to make something, but for those who are it, works.

Book Information

Audible Audio Edition

Listening Length: 46 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Yap Kee Chong

Audible.com Release Date: October 9, 2013

Whispersync for Voice: Ready

Customer Reviews

As I love crafts I was looking forward to reading this book. I just wanted to learn how to do a few simple projects and thought this book will be a perfect solution as the title says - step by step. Well, I was completely wrong. The book is full of very vague and general information, there is not a single project, and it is not useful at all. It is not useful to beginners like me, because there is no simple project that you can follow. It is not useful to persons who would like to start making jewelry as a

way to earn some money because there are no specific information whatsoever. All the information is so vague and even if you know nothing about jewelry you could probably figure it out. I will give you just one example - In Chapter 8 - Best Place to Find Materials to Make Jewelry the author mentions eBay. Yeah, you would never have guessed, right? And then in the same chapter I will quote a paragraph: "What Kind of Materials Do you Need? Because one of the great things about eBay is that if you do not necessarily know what type of jewelry that you want to create, then you can browse through the many materials available on the website. Looking at the different materials available is a great way to get ideas for what type of jewelry you would like to create." Really? And the author calls this what is in her book secrets?! At the end of the book "if you want to learn more secrets" there is a pitch directing you to a website with just one sales page asking you to subscribe to a newsletter... I got really tired at that point. What is a purpose of a beginners book if not to show them something and teach them? But certainly not that kind of secrets like - search on eBay and buy wholesale.
