Lovely and a very well written book i must say. I really loved the thought of making an organic perfume all by yourself with 24 hrs or even less. I love perfumes and i keep trying lot of them. I have a great collection of them. I found this book very interesting and grabbed it and now i'm just enjoying making it at home. If you really have all the required ingredients then you can start it as this book has all the instructions very clearly and its very easy to follow as well. Making organic perfume all by yourself will definitely give that self satisfaction and also is very good if you think from health perspective. Highly recommended and a must read book!!!!

Never did I imagine that I would find interest in organic perfume. However, this text has changed my mind. Not only is it a good read, there are also techniques on creating your own organic perfumes which I do plan to try soon. Also, the time frame that the book expects you to spend on making these types of perfumes seem realistic. It is a good read, will to disappoint.

What better than preparing your own organic perfume rather spending on one. I love this book as it has become necessity to reduce use of synthetic products in our routine. And we have a bonus chapter added "organic makeup", which makes it more beneficial. Highly recommended to people who wants to smell good all day. Must have one

Can't believe I just paid for it... No practical information beyond of what you can find in internet. Not even ONE recipe given! I wonder where all of this positive reviews come from...

My girlfriend is really into perfume, so for valentines day I figured I would try and make her some myself. This book has been my bible for the last couple days and I feel like an expert already. I highly recommend this book to anybody who wants to smell great and have some fun!
