Let’s get something off my chest right here and now. I rarely allow a single book to change my life, but I let Frank Romano’s 1984 work Type Encyclopedia send me on a whole new course. It is the book that single-handedly convinced me I could be an independent typographer, designing my own books and websites rather than putting up the cash for somebody else to do it. Since then I’ve gradually collected books on type, page design, and HTML coding. So when a venerable title like Type Rules! come down the Vine in its Fourth Edition, and it is written by a woman with a long history of modern typography on her resume, gotta figure there is something to check out here too.—Parameters—I compared Type Rules to four other books in my collection: Thinking with Type, 2nd revised and expanded edition by Ellen Lupton Typencyclopedia: A User’s Guide to Better Typography by Frank Romano EPUB Straight to the Point Creating ebooks for the Apple iPad and
other ereaders by Liz CastroButterick’s Guide to Practical Typography, a web book by Matthew Butterick (see comments for link). Each of these books has a slightly different intent, so the comparison cannot be complete. Thinking with Type is essentially that, a psychology art book for getting into a type frame of mind.
