Customer Reviews

Not really my favorite topic! But as an herbalist I always want to see books and websites that are purporting to use herbs for health. The book turns out to be very well written and in my opinion,

herbally sound.

I downloaded this book because my husband has low T. I got him started on the suggested supplement plan from this book in the hopes that he wouldn't have to start taking another prescription. The book makes a lot of sense to me and in my opinion it is always better to treat a condition with natural supplements and herbs rather than another prescription.

A really great read about supplements which can help boost your testosterone, zinc and tongkat ali were things I have known about for a while but the other supplements were new to me. I have been trying to lose weight for years and after adding a couple of the supplements to my daily routine the weight is starting to come off without over working and starving myself.

Sean is a good friend of mine, I honestly stalled on purchasing this book but Sean I am amazed about the information that is displayed in this book. It motivates a bit more to get up and start working out more. This book is what I really needed to boost my motivation. Short book but gets to the point.
