Since I got married young, I have never really had to concern myself matters of credit and debt. Fortunately my husband has carried that burden well. However, I realize as I near 29 years of age that it would be appropriate to be more aware of how our finances work and how I might personally be a better steward of them. So, I picked up a copy of "Improve your Credit Score" to see if I could gain a better understanding and employ the contents to prevent credit troubles rather than dig myself out of them."Improve your Credit Score" met and exceeded my expectations. It begins by explaining the big 3 credit reporting companies, their function and how they effect us. I am talking about major detail (but not worded in a complex, difficult to understand way) that breaks it down and guides you through. Everything from obtaining your credit report to boosting your credit score. At the end, Alexander Rich includes sample dispute letters for you to use as well. So, not only does he explain the how, he provides tools to help you with the how.Whether you are in the pit of a ruined credit score, or just clueless like me, this book seems very useful!
