Customer Reviews

Review is for both TMGP 1 & 2 as I believe they go hand in hand, and add a great deal more value as a set, than individually. VALUE I bought the kindle version/audiobook combo of both books for a total of under \$30. To put this in perspective, look at what Jared Tendler charges for coaching sessions by the hour. You are getting his complete educational framework for the mental game at a fraction of his hourly rate. I say that not at all to disparage the value of his coaching, as when you get to a high enough level of play, coaching is absolutely VITAL to incrementally increasing your performance and keeping your game consistent. Point being, the content of both books is worth many times the small investment you pay for them. CONTENT AND APPLICABILITY I became interested in poker through my interest in trading equities/commodities. I study the game because of

the many skill sets required by trading, that are also crucial in poker. These two books excel at strategies in sports psychology, not at all just poker. Are they written for poker players? Yes, but I had no trouble at all translating the strategies and processes in my head into useful mental strategies for trading as well. Jared, along with his co-authors has put together a unique series in every respect. I have read several "performance psychology" books in the past that simply served as teasers for the author's coaching services.
