Jet Fighters Inside Out

Synopsis

Illustrated with detailed artworks and full-color photographs, *Jet Fighters Inside Out* is a comprehensive study of key air superiority and ground attack aircraft developed since World War II. Arranged chronologically, each aircraft has a cutaway artwork labelled with key items of interest, and accompanying photographs showing both the aircraft's cockpit and exterior in detail, from every angle. With detailed specifications for each fighter aircraft, all the major types are featured, including the Phantom II, MiG-21 and F-22 Raptor, making *Jet Fighters Inside Out* an essential reference guide for modellers and aviation enthusiasts.

Book Information

Product Dimensions: 9.2 x 1.4 x 12.1 inches

Shipping Weight: 4.8 pounds (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars [See all reviews](#) (23 customer reviews)

Best Sellers Rank: #78,920 in Books (See Top 100 in Books) #3 in [Books > Arts & Photography > Vehicle Pictorials > Aviation](#) #20 in [Books > Arts & Photography > Photography & Video > Military History](#) #49 in [Books > Engineering & Transportation > Transportation > Aviation > History](#)

Customer Reviews

SPOILER-ALERT-- Really, only a spoiler alert for my thirty-two year-old son. I hope you have no time to check out this review just like my other reviews due to your busy schedule, because this is a XMAS gift for you. If you yourself enjoy seeing, reading, studying jet aircraft, or have a loved one that does... this is the book for you. I'm an honorably discharged Viet Nam Era Veteran and when I served I was on the ground and the jets were overhead. My full grown son has an Uncle who flew during Viet Nam and that among other reasons is why he has always had a fascination with jets. I researched a number of books dedicated to jets and this one looked like the best bet... and I was on pins and needles awaiting its delivery... hoping it was as good as it sounded. Wow! What a beautifully put together treasure. This should be quite a conversation piece for years to come as a coffee-table-book proudly displayed. The quality of the construction is superb. It is approximately 12

Ã Â " X 9 Ã Â " and almost 1 Ã Â " thick. (And it weighs close to FIVE POUNDS.) It has a beautiful colorful book jacket and each individual page is thick and glossy. The pictures are exquisite and the drawings are akin to an architect's blueprint and are eye-catching. The jets are listed chronologically from 1942 to the present. Even a novice such as myself will get caught up in the excitement just by randomly looking through the pages and stopping and checking key statistics that range from dimensions to weights to fuel to PERFORMANCE (THAT'S SPEED BABY!) and armament. When you see speeds listed past 1,000 MPH it's hard not to sigh and want to discuss it with someone.
