Assassin's Code: The Joe Ledger Novels, Book 4

Synopsis

When Joe Ledger and Echo Team rescue a group of American college kids held hostage in Iran, the Iranian government then asks them to help find six nuclear bombs planted in the Mideast oil fields. These stolen WMDs will lead Joe and Echo Team into hidden vaults of forbidden knowledge, mass-murder, betrayal, and a brotherhood of genetically-engineered killers with a thirst for blood. Accompanied by the beautiful assassin called Violin, Joe follows a series of clues to find the Book of Shadows, which contains a horrifying truth that threatens to shatter his entire worldview. They say the truth will set you free... Not this time. The secrets of the Assassin's Code will set the world ablaze.

ASIN: B007TXWZYA

Best Sellers Rank: #79 in Books > Audible Audiobooks > Fiction & Literature > Horror #382

in Books > Audible Audiobooks > Mysteries & Thrillers #725 in Books > Literature & Fiction >

Genre Fiction > Horror

Customer Reviews

I'm back in my groove and the review machine is churning now. Shoot, I even have a review of a book for you, days before it is to be released. Bask in my awesome might. This, is Assassin's Code by Jonathan Maberry. This is the fourth book in the Joe Ledger series of novels, a series that I have mad love for. The Joe Ledger series is like Resident Evil without the awful dialogue and shoddy plotting. It's like the hit FOX thriller 24 but with Bond Villains. It's like Larry Correia's Monster Hunter series with a focus on science instead of the supernatural. And Assassin's Code? It's like all that with a dose of Dan Brown's The Da Vinci Code. This is a freaking awesome book. Seriously, if you read my review of The King of Plagues and had any doubts about this series please just do yourself a favor and go buy all four books. Forget about reading this review, just go buy all four books and

start reading. Thank me later. When Iran kidnaps a few American college kids hiking along in the wilderness and accuses them of being spies, who ya gonna call? Joe Ledger and Echo Team. After a successful rescue Joe has an unexpected meeting with one of the vilest scumbags in Iranian politics. Joe is tipped off about the existence of several nuclear bombs planted in Middle Eastern oil fields and asked for help. Rushing against the clock to prevent the detonation of these weapons of mass destruction, Joe finds himself caught in the crossfire of a shadow war. A centuries old conflict, waged by super assassins and brought about by a wicked pact. Can Joe and the DMS prevent nuclear holocaust? So let me start by saying, WOW. Assassin's Code is the real deal. Easily the best book in the series to date. As much as I love Patient Zero, Assassin's Code is one step above in terms of sheer awesome.

I first caught Jonathan Maberry when I bought Patient Zero on a whim a couple of years back. Basic story was that lunatic terrorists were creating a zombie plague (of sorts), and a hastily-assembled tactical team attempted to take them out. In the course of the book, we were introduced to key characters Joe Ledger (our protagonist), Ghost (his dog), Rudy (his friend and therapist), Echo Team (the hastily-assembled tactical team), DMS (the covert agency responsible for dealing with situations like this), and Mr Church (the boss of DMS). I've never been a huge fan of the military operation books. Andy McNab does not grace my bookshelves (although I have the utmost respect for him). Zombie books do, although I'm not a hardcore obsessive. So, taking a chance, I tried a new author (something I do every now and then, usually when I've exhausted whichever author currently has me hooked. Most recently, Preston and Child. But that's another story). I was, very pleasantly, surprised. Ledger turned out to be an engaging character, with the sense of (often inappropriate) humour which tickled me. That same sense of humour helps drastically in cutting through what could be a fairly ridiculous situation. Thoroughly recommended. Anyway, following the initial Patient Zero came Dragon Factory and The King of Plagues. Each with their own new challenges for the developing Echo Team. Relationships and friendships built. Challenges were faced, adversities overcome, and each would make a fine standalone adventure. But, building behind the scenes, a bigger story started to emerge. A shadowy organisation (of Kings) bent on twisting the world for their own purposes. And lurking in the shadows, given nothing more than a throwaway moment, someone else. Which brings us to Assassin's Code.
